TABLE III. AVERAGE TERM IN DAYS, 1943-1944

This table lists the counties and cities which deviated in 1943-1944 from the State-supported term of 180 days, showing the actual terms for each of them; then gives the average term for all schools in the State based upon a distribution of average daily membership.

TABLE IV. SUMMARY OF ENROLLMENT

This summary shows by race for 1943-1944: the enrollment by schools (codes a + c + d + e) for all North Carolina administrative units; those enrolled in two or more schools within same unit or system (pupils coded c), permitting the enrollment by units (codes a + d + e) to be obtained by subtraction; those enrolled in two or more units (pupils coded d); the net State enrollment (codes a + e); those coming from other states (pupils coded e). The U. S. Office of Education desires pupils coded a—obtained by subtraction. This presentation illustrates the ambiguity of the term *enrollment*; there are four sets of figures. Net enrollment reduced to average daily basis is called average daily membership; see Table I.

TABLE V. WHITE ENROLLMENT (a+e) BY YEARS

This summary shows by grades the net enrollment (a+e) in all white schools of the State over a period of twelve years. By noting the figures just above the heavy horizontal lines, one may observe the lack of normal progress through the grades: 102,151 pupils in first grades in 1932-1933 as compared with 7,555 in twelfth grade eleven years later or 26,850 in eleventh grade ten years later. With 102,151 as base, a series of percentage calculations shows the percentage of losses or retardation from grade to grade.

TABLE X. PUPIL WORK ACCOMPLISHMENT BY GRADES

This tabulation shows by grades and race for 1943-1944: the number of pupils receiving credit for work of full year, the number performing at least half year's work (50-99 %), and the number accomplishing less than work of half year. The sum of these three groups equals the membership of Table VII, thus accounting—by amount of work accomplished—for all pupils on the roll at close of schools.

TABLE XI. INDEX OF ACCOMPLISHMENT BY GRADES†

This tabulation gives the figures of Table X in percentages and shows an index of work accomplished in the several grades. The index is the addition of percentages weighted according to quantity of work done; to the proportion of pupils doing full year's work are added (1) 50% of the percentage for half year's work, (2) 25% of the proportion for less than half year. For this index there are considered only those pupils in membership on last day; see Table XIV for percentages based upon enrollment (a+e).

TABLE XII. INDEX OF ACCOMPLISHMENT†
ELEMENTARY SCHOOLS—GRADES 1-8

Based upon the figures summarized by Table X, this table shows by race for the elementary schools (grades 1-8) in each administrative unit of the State during 1943-1944: the percentage of membership (last day of school) which received credit for full-year's work (100 % in quantity), the percentage which was credited with half-year's work (50-99 %), the percentage which received credit for less than work of half-year and an index figure which weights and combines these percentages. The index number, as in Table XI, allows full credit (100 %) for that proportion of pupils accomplishing (receiving credit for) work of full year, half credit (50 %) for the percentage doing half-year's work, one-fourth credit (25 %) for the remaining proportion of pupils. The index is the sum of these three credits, 100.00* representing quantitative perfection.

The summary groups the administrative units of the State—separately by race—according to their positions as indicated by this index number. The index attempts to measure quantitatively the work accomplished during the year by pupils remaining in school; those who quit school (losses) are not considered in these calculations. An index number based upon enrollment, as are the percentages of Table XIV, would be lower than the one shown here.

TABLE XIII. INDEX OF ACCOMPLISHMENT†
SECONDARY SCHOOLS—GRADES 9-12

Based upon the figures summarized by Table X, this table gives by race for the secondary schools (grades 9-12) in each administrative unit of the State during 1943-1944: the percentage of membership (last day of school) which received credit for full year's work (100% in quantity), the percentage which was credited with half-year's work (50-99% in quantity), the percentage which received credit for less than work of half-year and an index figure which weights and combines these percentages. The index number, as in Tables XI and XII, allows full weight (100%) for that proportion of pupils accomplishing (receiving credit for) work of full year, half credit (50%) for the percentage doing half-year's work, one-fourth credit (25%) for the remaining proportion of pupils. The index is the sum of these three credits—with *100.0 representing quantitative perfection.

The summary groups the administrative units of the State—separately by race—according to their positions as indicated by this index number. By comparison with summary of Table XII, the number of units having no high school facilities may be ascertained. The index attempts to measure quantitatively the work accomplished during the year by pupils remaining in school; those who quit school (losses) are not considered in these calculations. An index number based upon enrollment, as are the percentages of Table XIV, would be lower than the one shown here.

TABLE XIV. RELATIVE ACCOMPLISHMENT OF PUPILS BY GRADES

This tabulation divides the net State enrollment (a+e) into percentages, showing by race for each grade during 1943-1944: (1) the percentage dropping out of school, (2) the proportion doing full year's work, (3) the percentage doing half year's work, (4) the proportion accomplishing work of less than half year. This is an effort to measure the holding and promoting achievements of the school system.

Whereas Table XI considered only the children remaining in school, this calculation is based upon pupils enrolled (a+e).

TABLE XV. TRAINING OF TEACHERS AND PRINCIPALS

Based upon certificates held, as shown in budgets, this summary gives for 1943-1944 the number of State-paid teachers and principals by class of certificate, the proportion at each level of training and an index number.

Classified principals—shown separately—are deemed to be Class A in figuring the index.

TABLE XVI. EXPERIENCE OF TEACHERS

This summary gives the experience rating for 1943-1944 of those teachers paid from the State Nine Months' School Fund; those paid from local funds are excluded. Since only 9 increments were allowed by the State on Class A certificates, 6 on Class B, etc., the experience shown is not the actual number of years taught but the number for which compensation was paid.

Principals (building and classified) are not included.

TABLE XVII. SALARY SCHEDULES FOR TEACHERS

This tabulation gives the maximum and minimum amounts payable monthly to teachers from State funds during 1943-1944. Supplements by local units are additional.

The schedules are based upon years of training, which determine the type of certificate held, and years of teaching experience. A represents the maximum; B is the minimum.

TABLE XVIII. SALARY SCHEDULES FOR PRINCIPALS

This tabulation gives the maximum and minimum amounts payable monthly from State funds to classified principals during 1943-1944. Usually a school must have seven (7) or more teachers to be allowed a classified principal. The schedules are based upon number of teachers allotted to the school and number of years served as principal. There is an increase in principal's pay for every additional teacher—from 7 to 50; enough steps in the schedule are shown here to indicate the trend.

A Master's degree is required for the last three years of schedule—P-6 to P-8 inclusive.

TABLE XIX. INSTRUCTIONAL AND SUPERVISORY PERSONNEL

This table gives for each unit of the State during 1943-1944 a distribution of instructional and supervisory personnel—employed from all sources of funds—by race and grade-level. Teachers, as distinguished from principals and supervisors, are also divided according to sex.

The summary shows for North Carolina the number of teachers in elementary schools (grades 1-8), the number in high schools (grades 9-12), the number of vocational teachers, the number of principals and supervisors, the number of clerical assistants, the number of superintendents; then relates the instructional personnel to number of pupils in average daily membership and average daily attendance, as given in Table I.

Fractions appear in the summary and detailed table because of teachers working in both elementary and secondary fields, or teaching and supervising.

TABLE XXI. SCHOOLHOUSES AND SCHOOL PROPERTY

This table gives by race for each county and city unit of the State during 1943-1944: the value of school property, the number of schoolhouses owned, the average value of schoolhouses, the total number of classrooms and the average number of classrooms per school. With races combined, the table also shows for each unit the value of school property, total number of schoolhouses and their average value.

The summary gives several details of valuation for all (170) school systems and relates these figures to the number of schoolhouses, to classrooms, to teachers and to pupils.

TABLE XXII. NUMBER OF SCHOOLS TAUGHT—BY SIZE

This table shows by race for each county and city system of the State during 1943-1944: the number of elementary (1-8) and high (9-12) schools taught, distributed according to number of teachers employed, and the number of union schools. These latter include work in both elementary and secondary fields.

The summary gives the North Carolina total for each race with division between counties and cities. There also appears the number of separate elementary and separate high schools, as distinguished from the union schools.

TABLE XXIII. NUMBER OF SCHOOLS TAUGHT—BY GRADE LEVEL

This summary shows for 1943-1944 the number of schools which attempted various grade levels of instruction. On the elementary level (grades 1-8) there are three types of schools: primary, grammar and elementary. Primary schools are defined as those which go no higher than grade 5, beginning with the first grade; grammar schools teach only the intermediate grades, as 4-6, 6-8, or 7-8; elementary schools cover grades 1-6, 1-7, or 1-8.

On the secondary level the grouping is by years of instruction offered above eighth. One-year high schools teach only 9th grade, two-year schools have grades 9-10, four-year schools run from 9-12. A junior high school of grades 7-9 is considered here as a grammar school (grades 7-8) and a one-year high school. Senior high schools (grades 10-11 or 10-12) are shown separately.

TABLE XXX. SCHOOL LIBRARIES

This summary gives by race for all school systems of the State during 1943-1944: the number of libraries in elementary and high schools, the total number of school libraries, the number of volumes in those libraries, their estimated value, the amount expended for library maintenance (current expense) and for purchase of new books (capital outlay). At bottom of page is a comparison of the number of books in school libraries at intervals covering a period of 14 years.

* The apparent decrease for cities is due to change of territory for administrative purposes. In 1932-1933 there were 93 cities and towns operating as units of administration; in 1933-1934 these were reduced to 67, the 26 smaller towns being transferred to county systems. In 1935-1936 there were 68 city units; during 1939-1941 the number increased to 71; for 1941-1942 and since there have been 70.

TABLE VII. EXPENDITURES FOR GENERAL CONTROL

This summary shows administrative expense (except State) for all public elementary and secondary schools of North Carolina during 1943-1944. The amounts paid superintendents and clerical assistants are reduced to average annual basis.

Average salaries were determined by a division of amounts paid (codes 611 and 644 for superintendents, codes 613 and 627-1 for clerks) by the number of people employed, as shown on Table XIX of Section I.

A separation of administrative costs between white and Negro schools, also shown, was made by pro-rating average daily membership in each unit.

Expenditures for State administration—not shown here—are set forth in last table of Section III.

TABLES VIII AND IX. EXPENDITURES FOR INSTRUCTIONAL SERVICE

These two tables give by race for each county and city school system of the State during 1943-1944: the amount of salaries paid teachers in elementary and secondary schools; the amount paid principals and supervisors; the cost of supplies, of textbooks (free to pupils) in grades 1-7 of elementary schools, of vocational education and of all other items of instructional service. Table VIII is devoted to instruction in elementary schools (grades 1-8); Table IX gives data for instructional costs in secondary schools (grades 9-12).

The summary of the two tables shows by race the average salaries paid teachers and principals during 1943-1944. For number of people employed, see Table XIX of Section I. Since the cost of vocational education is coded separately (626), all vocational teachers were deducted from the total of Table XIX before computing the averages. Expenditures for vocational education (code 626) are reduced to a per-teacher basis; the figures given include travel and other expense as well as salaries.

TABLE XVII. CITY TAX RATES

This table shows for 70 cities of the State—those operating as school administrative units, arranged alphabetically by counties—the property tax rates levied during 1943-1944 for schools, for other than school purposes and for all purposes; then gives the proportion which went to schools. Taxes levied by counties are additional; see Table XVI.

At the bottom of second page is an unweighted average of these city tax rates for several years.
